Sheet Metal Magnets & Corner Magnets

Ideal for positioning and holding sheet metal for butt welding.

SHEET METAL MAGNETS

Hold sheet metal and automotive metal panels firmly in a positive location for cutting, welding, tacking, painting and repair operations.

Rare earth disc magnets in the magnetic plate have superior gripping power. Rubber Pads on the Sheet Metal Magnets provide friction for increased drag force in sheet metal handling applications.

Use horizontally or vertically. The strong, generously sized plastic handle makes placing, moving, and removing the Sheet Metal Magnets fast and easy.

CORNER MAGNETS

- Create 90° corners by holding from the outside, providing you with an unobstructed area for inside tack welds.
- One side corner "relief" provides clearance for tall lips.
- Use the outer edges of the Corner Magnet for setting up materials at 60°.

The compact and low profile Corner Magnet is ideal for light duty holding of stock at 90°.

Use the outer edges of the Corner Magnet to hold stock at 120°.

Part No.	Description	Dimension (mm)	Max. Pull Force (kg)	Weight (kg)
MST327	Twin Pack 90° & 60°	83 x 95 x 16	14	0.4

⚠ *Must be used for tack welding only and removed before completing weld. Avoid prolonged exposure of magnetic products to heat sources of 176°F / 80°C.*

Inside Outside Angle Magnets

Hold stock using the Inside or Outside edges!

Hold stock from the outside when inside access is difficult.

Hold and position sheet metal, round pipes, square, angled or flat stock.

The Inside / Outside Angle Magnets are constructed from two independent rectangular magnets for consistent, undiminished magnetic force when both sides are attached to workpieces.

Use mounting holes to link two magnets together for use as fixturing elements.

Use hex hole on magnet for breakaway leverage.

Half Clamp & Hold Down Clamp

Hold down action clamps with unique features and accessories.

HALF CLAMP

The Efficient, Safe Way to Align Materials.

The DOG & WEDGE and CUT-OFF C-CLAMP methods of material alignment are messy, time consuming, and unsafe!

- Align materials in the fabrication of water tanks, bulkheads, deck sections, flat plates, etc.
- For big jobs, tack weld additional 48 mm cut pipes along the joint.

Part No.	Weight (kg)
VHC15	2.2

How to Use

Tack weld the front side of 48 mm pipe coupon to the lower of the two surfaces.

Slide Half Clamp onto the cut pipe, turn the handle until the misaligned materials align.

Use the rear slot on the Half Clamp to easily break off the coupon.

HOLD DOWN CLAMP

Bolt the clamp down to your worktable using the Ø10.5 mm hole in the base.

- The 12.5 mm copper plated Acme spindle resists weld spatter, and the swivel tip makes quick contact with your workpiece.
- Hold pipes by adding our Clip-On V-Pad, Part No. XDA2. (See page 49 for details.)

MAGNETIC PLUG WELDING TOOL

The hands-free tool for fast, high quality hole welds!

- The pivoting magnetic v-pad base quickly mounts on curved steel panels.
- The spring-loaded arm makes it easy to just “place and weld.”
- Long arm protects the magnetic base from heat damage.

This handy, compact tool saves time and labor for efficient, clean welding of holes, joints, and seams in steel panels. Easy to use, even in tight, hard to reach spots.

The thick copper pad dissipates heat and won't stick to the weld. Get a precise, clean, higher quality flat weld with less panel distortion.
